Education

D.Y. Patil School of Engineering, Pune

2023 batch

Computer Engineering (B.E) (CGPA 9.1/10)

Projects

Songs Like That

- A songs recommendations web app, which generates a playlist based on given artists and songs.
- Users can login with their spotify account and add the generated playlist to their account.
- Made using **React.js**, **Material Ui**, **Express** for generating the access token on the backend.
- Live version - <https://songs-like-that.vercel.app/>

Flack

- A minimalistic chat app
- Made using vanilla **Javascript** / **css** and **socket.io**, **Flask** for the backend.
- Implemented file sharing.
- Live version - <https://flack-xatriya.herokuapp.com/>

Gitlet

- A lightweight java implementation of **git**
- supports almost all standard **git** commands.
- Code - <https://github.com/akashjkhamkar/Gitlet>

Book review website

- Made for discussing books, made using **Flask** and **Postgresql** and vanilla **Javascript**
- Users can create an account, rate books and add comments.
- Live version - <https://bookd-project1.herokuapp.com/>

Sorting visualiser

- Implemented functionality to pause / play and custom number of elements.
- Made using **React.js** | Live version - <https://sort-xatriya.vercel.app/>
